| Offer Due Date: | March 15, 2021 11:59 PM PST |
| Submit Offers via: | https://neonatal.rti.org |

1. How can I find out more about the Milrinone in Congenital Diaphragmatic Hernia Trial?

Please be directed to the following publication which outlines the trial more in depth:

<https://pubmed.ncbi.nlm.nih.gov/29209510/>

2. Can you describe the requirements and format of the cost proposal?

This cost proposal may be atypical, since we have included set capitation amounts. The cost proposals will need to show that your institution agrees to the capitation amounts listed in the RFP (which are intended to cover salary costs), agree to the payment method, and include your institution's relevant indirect rates (with documentation, such as a Negotiated Indirect Cost Rate Agreement).

3. Can you please clarify the page limit of the research proposal?

The total page limit of the research proposal is 10 pages (excluding attachments). Individual section limits are suggested but not mandatory.
